SUMITOMO

#### JAPANESE TECHNOLOGY

The world knows that Japanese designed and engineered products represent the highest quality, especially for Industrial Products. The hydraulic excavator is no exception when a totally integrated concept is required in design work involving key components, manufacturing engineering, and product quality assurance in the factory. SUMITOMO hydraulic excavators are designed and manufactured today to meet the global demands of our many customers with the concept of Performance, Reliability, and Fuel Efficiency foremost in our minds This proven Japanese technology and quality gives SUMITOMO excavator customers total peace of mind and provide a complete solution for the demands of the construction industry.

### Engine and Hydraulics 04-07

- New Generation Engine System "SPACE 5+"
- New Hydraulic System "SIH:S+"
- ·SUMITOMO Fuel Efficiency Technology
- ·Drastically Increased Productivity

### Durability and Maintenance 08-11

- ·High Rigidity Attachments
- ·EMS
- ·Ground Level Maintenance

### Safety and Operator Comfort 12-17

- ·Stylish and Spacious Cabin
- ·High-Definition Full Colour LCD Monitor
- ·FVM<sup>®</sup> (Field View Monitor) (option)

### Specifications 18-23

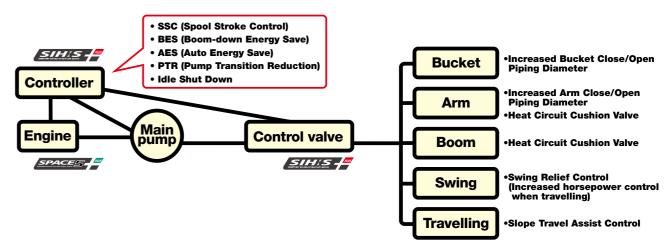

#### New Generation Engine System "SPACE 5+"

The new engine system optimises fuel efficiency and environmental performance via the advanced common rail fuel injection system, cooled EGR system. At the same time, excellent response times are achieved.

## **Engine and Hydraulics**

SH490LHD-6 has achieved a 13% fuel saving in comparison with our DASH 5 series, by fusing the new generation engine system "SPACE 5+" and the new hydraulic system "SIH:S+", further refining fuel efficiency. At the same time the newly developed ISUZU engine, contributes greatly to the environment.

#### Mode Selection by Throttle

There are three working modes available: SP (Super Power) for heavy duty applications, H (Heavy) for normal working conditions, A (Auto) for a wide range of operations.

#### **Further Improvement of Fuel Consumption**

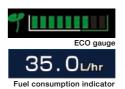

The new technology has improved operations and reduced fuel consumption on each working mode.

\*Fuel consumption may vary from time to time depending on site and working conditions operator skill and other circumstances.

#### ECO Gauge Showing Low Energy Operation

The energy saving conditions can be seen at a glance, as well as the fuel consumption indicator shown on the monitor.

#### SUMITOMO Technology for Fuel Efficiency

### SSC (Spool Stroke Control)

Reduces engine load upon heavy duty operation.

#### BES (Boom-down Energy Save) SUMITOMO UNIQUE DESIGN

Lowers engine speed upon boom-down and swing operation which does not require large oil flow.

### •AES (Auto Energy Save)

Lowers engine speed accordingly when low engine load is sensed.

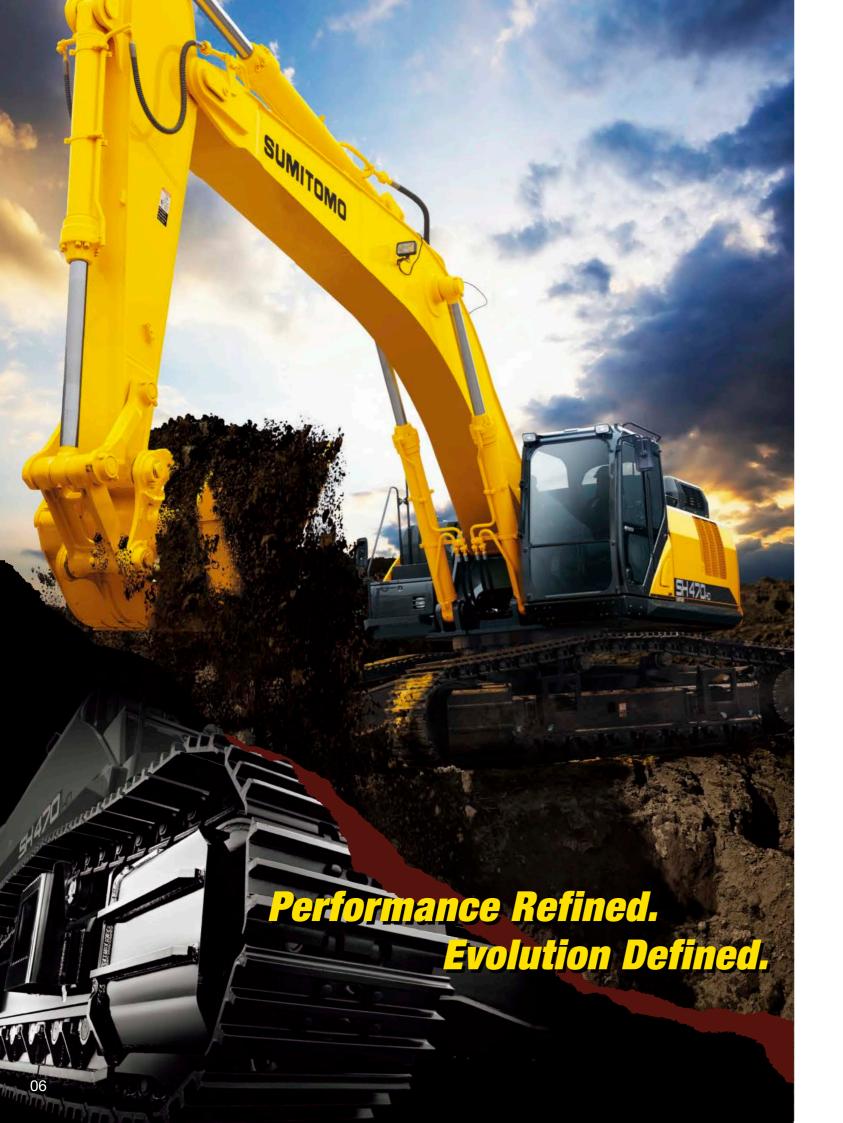

### •PTR (Pump Transition Reduction)

Decreases engine load when the pump flow requirement is reduced upon abrupt pump load.

### Idle Shut Down & Auto Idle

Upon activation, idle shut down automatically shuts the engine down when the machine is not in operation for set amount of time. Auto Idle is also available, which makes the engine begin idling approximately five seconds after the operation levers are in neutral position.

## **Engine and Hydraulics**

SUMITOMO's original technology Spool Stroke Control (SSC), perfectly matches the engine and hydraulic power, and further improves the operational speed whilst maintaining smooth control of the machine.

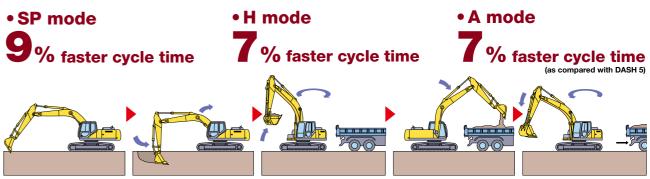

#### Work Efficiency Drastically Increased

Spool Stroke Control (SSC) variably controls spool port flow rate, depending on the condition of operation. Improved power, speed, and smoother controls mean that work efficiency is dramatically increased.

#### **Real Digging Power**

The true digging force cannot be expressed by a maximum digging power figure listed in sales brochures. With an improved hydraulic system and with a large arm cylinder, the arm-in motion speed slowdown is minimised. The digging power when combined with the attachment speed in motion convert to the operator's "Real Digging Power".

### **Speed and Power, Increases Productivity Drastically**

#### **Operating Condition Easily Viewable** on Display

Various control such as working modes and auxiliary hydraulic setting can be easily selected by the universally designed switch panel, and what is being selected can be easily viewed on the 7" wide monitor.

#### 9% Faster Cycle Time (SP mode)

Speed increase by 9% in cycle time has been achieved, giving further advance in productivity (as compared with DASH 5 [SP mode]).

#### **Automatic Power Boost**

The digging power increases automatically in quick response to the working conditions during heavy-duty digging work. This is a design unique to SUMITOMO, and continues for eight seconds (SP/H mode).

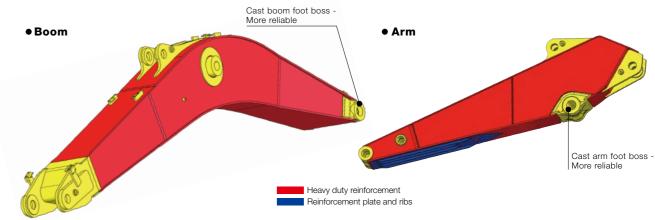

\*Based on SUMITOMO's testing condition and results.

**Durability** 

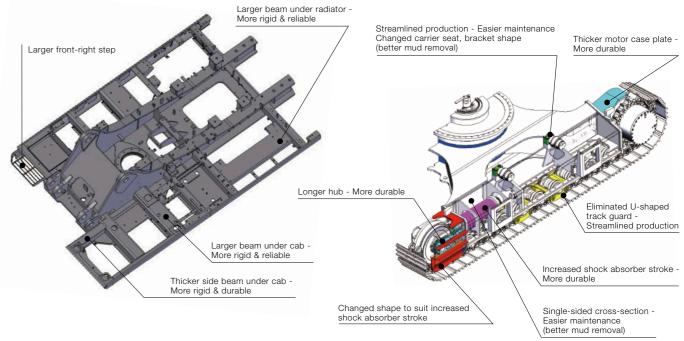

#### **High Rigidity Attachments**

The structure of the boom and arm has been further improved, ensuring strength and durability. In addition, high strength castings are used for the boom base and arm end, improving reliability.

#### **High Rigidity Swing Frame**

The swing frame has been strengthened to support the new cabin, as well as to increase durability.

#### EMS (Easy Maintenance System) as Standard

5H470+0

SUMITOMO's EMS keeps the pins and bushes fully lubricated at all times and prevents rattling. This system significantly extends the service life of the pins and bushes.

The lubrication interval is 1,000 hours, keeping the joints lubricated for a long time and extending the service life of parts by reducing abrasion and rattling.

EMS bushing

Precautionary use of EMS

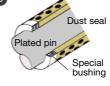

Q

SUMITOMO

Solid lubricant Hiał strength brass

accordingly.

B The surface of the pin is plated to increase the surface hardness and improve the wear resistance

① Grease is enclosed, however greasing is necessary every 1000 hours or six months depending on the level of dusting conditions. O Greasing is also necessary after any components have been submerged underwater for prolonged periods. ③ Greasing is also recommended after use with hydraulic breakers, crushers or other high impact attachments such as Rock Saws etc. 3 Bucket pins should be cleaned thoroughly when removing or attaching new buckets.

#### High Rigidity Undercarriage

For improved mobility, the track system has been strengthened ensuring longer wear life, performance, and improved reliability.

## Performance Refined. **Evolution Defined.**

### **Maintenance**

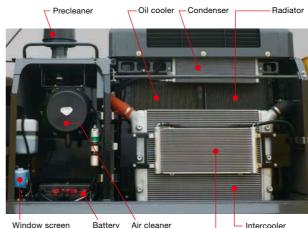

Serviceability and durability are also important points of machine performance. Ground level access to the engine area makes daily maintenance extremely straightforward. Reliability has been further enhanced by increasing cooling capability and durability.

#### Ground Level Access to Engine Area Improves Preventative Maintenance

Parts cleaning and maintenance are possible from the ground without climbing onto the upper structure of the excavator body.

#### Increased Cooling Capability

With the larger radiator and oil cooler, cooling capacity is increased, thus improving reliability. In addition, cleaning of the dust-proof net is simplified.

Window screen washer bottle

L Intercooler Fuel cooler

#### **High-Performance Return Filter**

The hydraulic oil change interval is 5,000 hours, and the return filter change interval is 2,000 hours. One high performance return filter keeps the same level of filtering as a nephron.

• Hydraulic oil change: **5,000** hours • Life of filter: **2,000** hours

\* The oil and filter change interval varies by the working conditions.

#### Cab Floor Mat SUMITOM

The washable floor mat has been redesigned for ease of removing and cleaning.

#### • Easy Filter Replacement

A fuel prefilter to the main fuel filter is provided as standard equipment to reduce trouble. In addition, the fuel and oil filters are installed at ground-accessible location to facilitate replacement. - Pre-fuel filter (with water separator)

Pilot filter Main fuel filter

Engine oil filter

Pre-fuel filter (with water separator and water level sensor)

#### **Pre-air cleaner**

A pre air cleaner is provided as standard. The air cleaner cleaning frequency is minimised, even when operating in dusty conditions.

#### Easy Access to A/C Filter

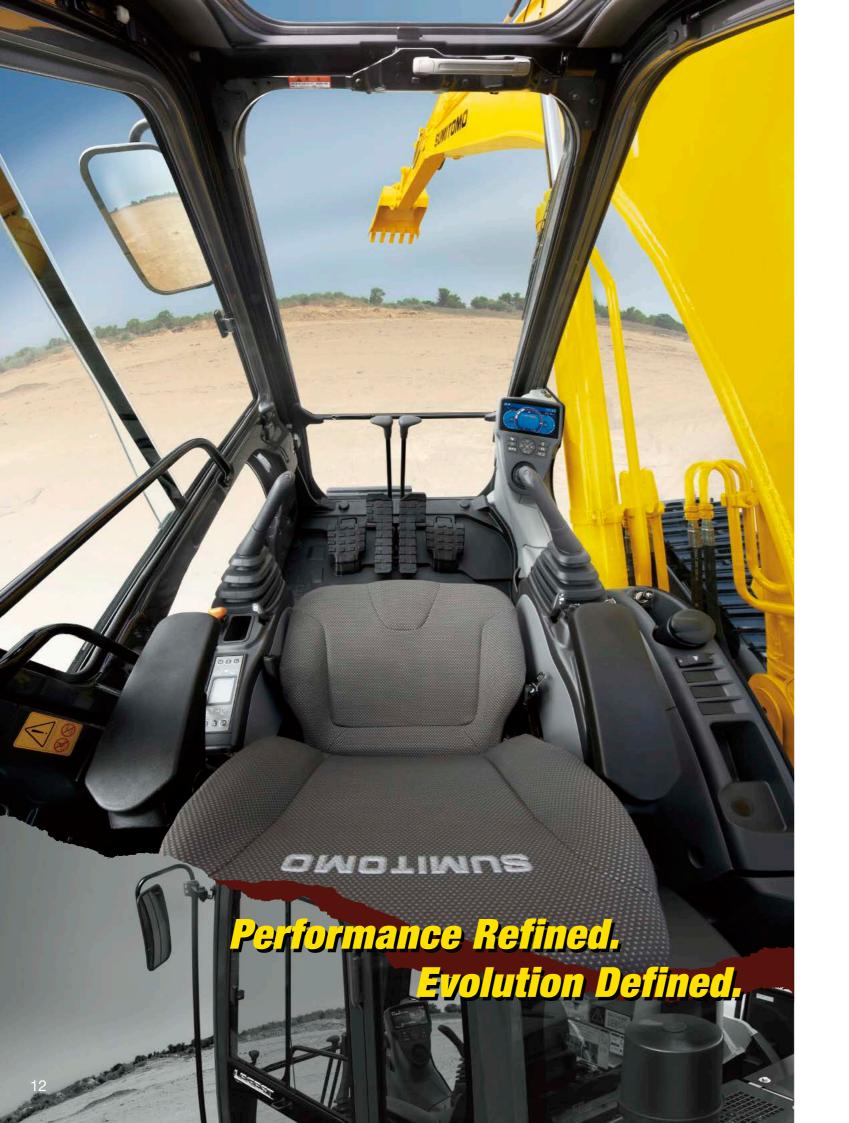

The air intake filter is located in a lockable compartment to make it easier to replace, and access to the inside cab filter has been simplified.

#### **Fuse Box Location**

The fuse box has been located in a separate compartment behind the seat, allowing easier access.

## **Safety and Operator Comfort**

A new strengthened safety cabin has been provided. The reinforced cabin greatly increases operator's safety.

#### **Newly Designed Safety Cabin**

The optimised design and strengthened parts increase the overall cabin strength.

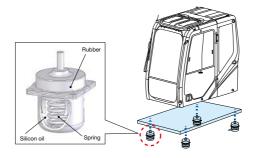

#### Wide View Increases Safety of Work

In addition to the wide front view, the upper view has been widened to enhance work safety.

#### **New Cab Suspension Mounts**

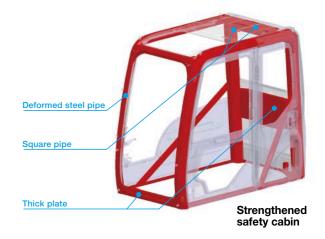

The new cab suspension mounts reduce vibration and impact transmitted to the cabin, and improve the operator's sitting quality and reduce operator fatigue. The sealed and pressurised cabin prevents entry of dust from outside.

#### New FOPS Level 2 Head Guard (option)

FOPS Level 2 head guard is available as an option. The see-through grille has been redesigned for better protection and visibility.

#### Safe and Easy Entry into and Exit from the Cab

A large handrail for easy opening/closing of the door and increased floor space permit the operator to get in and out of the cab easily.

Easy Access to the Upper Structure

ISO-compliant large handrail

#### **Cab Front Guard (option)**

Optional cab front guard improves operator's safety from flying objects.

## **Safety and Operator Comfort**

The spacious cab on suspension mounts and reclining suspension seat softens operator fatigue and provide a relaxed environment.

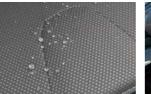

#### Stylish and Spacious Cab

Wide cab space and floor space ensure more comfortable operation. In addition to the tilting console that is adjustable in four steps vertically, the increased sliding distance ensures optimum working conditions.

#### Super-comfortable Reclining Seat

The seat reclining system allows the operator to lay the seat flat and to rest on site without having to remove the headrest. The suspension seat eliminates vibration and fatigue. Air suspension is also available as option.

The highly water repellant seat covering is tough on dirt and water.

Air suspension (option)

**Auxiliary Operation Pedal** 

The auxiliary operation pedal is lighter to depress and the

#### **Comfortable Equipment**

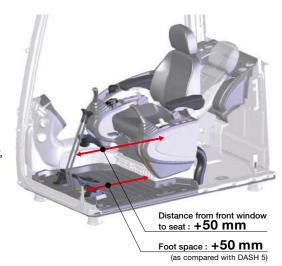

pedal angle is adjustable.

Luggage space Hot & cool box Magazine rack

#### **Automatic Air Conditioner**

Fully automatic climate control is available through the eight vents, with an 8% stronger A/C unit, and a 24% improvement in airflow. (as compared with DASH 5)

#### Radio and Speaker with USB Port and MP3 Jack

In addition to the AM/FM radio and dual speaker system with improved sound quality, auxiliary audio port is provided standard for devices such as MP3 players.

#### Lever Switches

One-touch idle, horn, radio mute, or one-touch wiper buttons are installed on the operation levers in consideration of improved operability while working.

Radio mute switch (left lever)

One-touch wiper switch (right lever)

## **Safety and Operator Comfort**

To support the operator in the field, the DASH 6 incorporates a 7 inch wide full-colour LCD monitor with numerous functions and easy operation switch panel. The cabin with enhanced operator comfort ensures a safe working environment.

#### Large High-Definition LCD Monitor

A new large high-definition full colour LCD monitor has been introduced with better visibility and a switch panel which is easy to operate. Added functionality such as ECO gauge showing parameter of energy saving, display of operation status and warning messages, provides accurate information which improves work efficiency and safety.

#### FVM for Greater Worksite Safety (option) SUMITOMO

As an additional option, the monitor can be upgraded to Sumitomo's proprietary FVM (Field View Monitor), which provides a clear, top-down view of the excavator around to 270° during the day and at night. This makes it so much easier for the operator to monitor the area nearby, enhancing overall safety on worksites. Different camera views can also be toggled on a single monitor.

#### Indicators

Pilot filter line	8 microns
Suction filter ······	105 microns

Hydraulic c	ylinders	6 ( ) MASS
Cylinder	Q'ty	Bore x Rod Diameter x Stroke
Boom	2	170 mm x 115 mm x 1,550 mm
Arm	1	200 mm x 140 mm x 1,820 mm
Bucket	1	165 (170) mm x 115 mm x 1,285 (1,335) mm

Double-acting, bolt-up-type cylinder tube-end; hardened steel bushings are installed in the cylinder tube and rods ends.

#### Cabin & controls

The cabin is mounted on four fluid mountings. Features include safety glass front, rear and side windows, adjustable upholstered suspension seat with headrest and armrest, cigarette lighter, pop-up skylight window, and intermittent wiper with washer.

The front window slides upward for storage, and the lower front window is removable. Control levers are located in four positions with tilting control consoles. Built-in type full-colour monitor display. Membrane switch on monitor display.

#### Swing

Planetary reduction is powered by an axial piston motor. The internal ring gear with has a grease cavity for pinion. The swing bearing is a single-row shear type ball bearing. Dual stage relief valves are used for smooth swing deceleration and stops. A mechanical disc swing brake is included.

SH470HD-6/SH490LHD-6/SH510LHD-6							
Swing speed	0~9.0 min-1 (rpm)						
Tail swing radius	3,730 mm						
Swing torque	150 kN·m (15,295 kgf·m)						

#### Undercarriage

An X-style carbody is integrally welded for strength and durability. The grease cylinder track adjusters have shock absorbing springs. The undercarriage has lubricated rollers and idlers.

#### Type of shoe: sealed link shoe

#### Upper rollers -

Heat treated, mounted on steel bushings with leaded bronze casting, sealed for lifetime lubrication.

#### Lower rollers -

Heat treated, mounted on steel bushings with leaded bronze casting, sealed for lifetime lubrication.

#### Track adjustment -

Idler axles adjusted with grease cylinder integral with each side frame; adjustment yoke mechanism fitted with heavy duty recoil spring.

SH490LHD-6

SH510LHD-6 SH490LHD-6 MASS SH510LHD-6 MASS

#### Standard Equipment

#### [Hydraulic system]

#### •SIH:S+ hydraulic system

- •Operation mode (SP, H and A mode) •Automatic 2-speed travel
- •Automatic power boost
- •Arm/boom/bucket reactivation circuit
- •Automatic swing parking system
- High-performance return filterHybraulic drive cooling fan

#### Open air introducing pressurised full-automatic air conditioner Defroster

Strengthened cabin

(in cab structure)

•Top guard OPG level1

•Shock-less cab suspension by 4-point fluid mounts

•Built-in type full-colour monitor display

•Hot & cool box

•Tilting console

- •Water-resistant seat
- Seat suspension
   Armrest & headrest

[Cabin/interior equipment]

- Windscreen wiper (with intermittent operation function)
  Cup holder
  AM/FM radio
- (with muting function) with AUX port & USB port
- Radio mute / Windscreen wiper
- •Clock
- Magazine rack
- Accessory case
- Floor mat
- Ashtray & cigarette lighterCab light (Auto-OFF function)
- •Coat hook

#### Accessories (option)

#### Rain deflector

Head guard (FOPS level 2)

Side camera

- Full track guard
- Refuel pumpISO compliant mirror
- Sun visor
- - Rain deflecter
  - $\blacksquare$  Polycarbonate roof top window with sunshade

20

#### [Safety equipment]

- Rearview mirror (left/right)
- Emergency escape tool
- Retracting seat belt
- •Gate lock lever
- Travel alarm
- (with on and off switch) •Anti-theft alarm system
- •Engine room firewall
- •Fan guard
- •Engine emergency stop switch
- •Engine neutral start

#### [Others]

- Auto/one-touch idling
- •Auto idle shutdown system
- •EMS
- Long-life hydraulic oil
- •Five lights (cab-top 2, boom 2, main unit 1)
- •Fuel filter
- •Fuel prefilter (with water separator)
- •Double-element air cleaner
- •Grease-enclosed track link
- Large tool box
- •A set of tools
- •Precleaner
- •Grouped greasing for TTB

Front guard (OPG level 1 or 2)

Front net guard (full/lower)

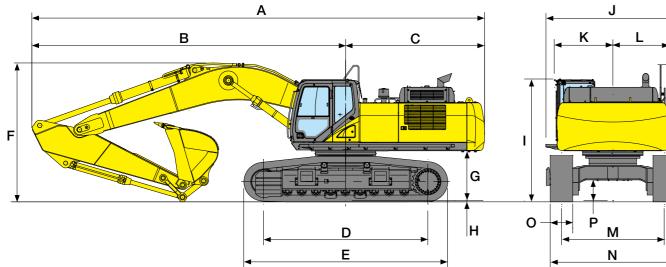

Rear view camera

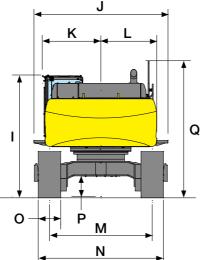

ISO compliant guardrail
 Hose burst check valve (HBCV) for boom/arm cylinders
 Air suspension (KAB seat)
 FVM (Field View Monitor)
 12V power (DC-DC converter)
